

# PulseKin AI Biomarker Report

|              |             |
|--------------|-------------|
| Patient Name | John Doe    |
| Age / Gender | 41 / Male   |
| Report ID    | PK-BIO-2026 |
| Date         | 22 May 2026 |

## Extracted Biomarkers

| Biomarker                | Result     | Reference Range |
|--------------------------|------------|-----------------|
| Glucose                  | 141 mg/dL  | 70-100 mg/dL    |
| BloodPressure            | 132 mmHg   | < 120 mmHg      |
| BMI                      | 28.4       | 18.5-24.9       |
| Age                      | 41         | All ages        |
| Insulin                  | 26 mg/dL   | < 25 mIU/L      |
| DiabetesPedigreeFunction | 0.67       | 0.0-1.0         |
| Bilirubin                | 0.7 mg/dL  | 0.2-1.3 mg/dL   |
| Creatinine               | 0.83 mg/dL | 0.66-1.25 mg/dL |
| Hemoglobin               | 14.5 g/dL  | 13.0-17.0 g/dL  |

**AI Analysis Summary:**  
Elevated glucose, insulin, and BMI levels suggest moderate diabetic risk and metabolic imbalance. Blood pressure is mildly elevated. Bilirubin, creatinine, and hemoglobin are within acceptable clinical range. Lifestyle modifications, routine monitoring, and physician consultation are recommended.
