

Narayana Health Hospital

Bengaluru, Karnataka | Emergency: +91-80-7122-2222

Patient Name	Rajesh Kumar
Patient ID	NH-2026-44781
Age / Gender	52 / Male
Date	23 May 2026
Consulting Doctor	Dr. Ananya Rao (Internal Medicine)

Chief Complaints:

Frequent urination, chest discomfort, dizziness, fatigue, excessive thirst, and shortness of breath for the past 3 weeks.

Laboratory Investigation Report

Test	Result	Reference Range	Status
Fasting Blood Sugar	298 mg/dL	70-100 mg/dL	Critical High
HbA1c	11.2 %	< 5.7 %	Critical High
Blood Pressure	168/108 mmHg	< 120/80 mmHg	High
Total Cholesterol	289 mg/dL	< 200 mg/dL	High
Triglycerides	312 mg/dL	< 150 mg/dL	Critical High
Creatinine	1.9 mg/dL	0.66-1.25 mg/dL	High
Bilirubin	1.8 mg/dL	0.2-1.3 mg/dL	High
Hemoglobin	10.2 g/dL	13-17 g/dL	Low
Vitamin D	7.5 ng/mL	30-100 ng/mL	Deficient

Clinical Impression:

The patient is identified as HIGH RISK for uncontrolled Type 2 Diabetes Mellitus with associated hypertension and cardiovascular complications. Immediate medical attention and strict glycemic control are advised. Elevated creatinine suggests possible early diabetic nephropathy.

Prescription

Medicine	Dosage	Frequency	Duration
Metformin 500mg	1 Tablet	Twice Daily After Meals	30 Days
Telmisartan 40mg	1 Tablet	Once Daily Morning	30 Days

Atorvastatin 20mg	1 Tablet	Night	30 Days
Vitamin D3 Sachet	1 Sachet	Weekly Once	8 Weeks
Insulin Glargine	10 Units	Before Bedtime	14 Days

Doctor's Advice:

- Strict diabetic diet and low sodium intake
- Daily 45 minutes walking recommended
- Monitor fasting and postprandial glucose regularly
- Immediate cardiology consultation advised
- Follow-up review after 7 days
